

THE BASELINE · GOOGLE BUSINESS PROFILE

11 things to fix on your Google Business Profile.

Not fifty. Eleven. This is the baseline every trade business should have in place before worrying about anything clever — the things that decide whether you show up in the Map Pack, and whether AI has enough about you to recommend you.

How to use this: work top to bottom. Most of it is free and you can do the whole lot yourself in an afternoon. Tick as you go — if you can tick the lot, your profile is ahead of most tradies in your area.

-
- ☐ **01 Claim and verify the profile**
If there's no "verified" tick, none of the rest counts. Search your business name on Google, claim the listing, and complete Google's verification.
UNVERIFIED PROFILES RANK NOWHERE
-
- ☐ **02 Set the right primary category**
Pick the one that matches what you actually do — "Electrician", not "Contractor". Add secondary categories for your other services.
THE SINGLE BIGGEST RANKING LEVER YOU CONTROL
-
- ☐ **03 Fill in every field — and keep it consistent**
Business name, phone, address, website, hours. Make sure they match your website and your socials *exactly*, right down to how you write the street.
MISMATCHED DETAILS MAKE GOOGLE UNSURE YOU'RE ONE BUSINESS
-
- ☐ **04 Set your service areas**
List the suburbs and postcodes you actually travel to. Be realistic — covering half the state waters down every one of them.
THIS IS HOW YOU APPEAR IN "NEAR ME" SEARCHES
-
- ☐ **05 List every service on your website**
Add each one as its own entry with a short description. If a service is on your website, it should be on your profile — same wording, nothing missing.
GIVES GOOGLE AND AI SOMETHING SPECIFIC TO MATCH
-
- ☐ **06 Fill out the Products section**
Think of Products as another shopfront for your services. Mirror what's on your website, sort them into categories, and give each one a photo and a short description.
MOST TRADIES LEAVE THIS EMPTY — IT'S FREE SPACE
-

07 Write a real business description

750 characters on what you do, who you do it for, and where. Write it for a customer, not for Google — plain English, no keyword stuffing.

OFTEN THE FIRST THING AI QUOTES ABOUT YOU

08 Upload at least ten real photos

Logo, cover, your van, your team, and finished jobs. Real photos from your phone beat stock every time. Name the files properly before uploading.

PROFILES WITH PHOTOS GET SIGNIFICANTLY MORE ENQUIRIES

09 Add your social profiles

Link your socials to your profile. If you've only got one or two, set up a couple more — Facebook, Instagram, LinkedIn, YouTube, TikTok.

HELPS GOOGLE AND AI CONFIRM YOU'RE ALL ONE BUSINESS

10 Ask for reviews — and reply to all of them

Message your last five happy customers and ask. Then reply to every review you have, good and bad. A short, calm reply to a bad one does more good than you'd think.

REVIEWS ARE WHAT PEOPLE CHECK BEFORE THEY CALL

11 Post an update — then keep posting

A finished job, an offer, a seasonal reminder. Once a week is plenty. The point is that the profile looks alive rather than abandoned.

AN ACTIVE PROFILE SIGNALS YOU'RE STILL TRADING

Ticked them all?

Then you've got the baseline right — which already puts you ahead of most trade businesses in your area. The next layer is the part most people never get to: connecting your website, your socials and your profile so that AI search has enough about you to recommend you by name.

IF YOU'D RATHER NOT DO IT YOURSELF

We'll walk your profile with you — free.

A 30-minute Zoom call where we go through your Google Business Profile together, show you exactly what's missing, and you keep the findings whether you work with us or not.
